DESCRIPTION	HOURS / QTY	HOURLY RATE / F...	TOTAL
<p>revisions reasonable. We consider any individual request that takes over 5 hours to do a major revision and not minor. An example of an unreasonable and major revision would be if a client is on their 2nd set of revisions and asks for a Flash piece previously approved to be re-done another way. This is a change of heart and not a revision and will add an additional charge TBD at that time to the project. Other unreasonable and non-included revisions are complete concept changes, page/section name changes, new functionalities never discussed previously or included on the estimate, entire color scheme changes or changes that force a re-architecture of the site's HTML templates. Examples of reasonable changes included are font adjustments, minor color changes, photo swaps, aligning items better, etc.</p> <p>REVISION SETS: This is an overall set of changes that a client gives Vivid Candi at a set milestone in the project. Vivid Candi will notify the client when to give any website an official review and provide a revision set. We welcome phone conferences or meetings to review revisions sets.</p> <p>WORDPRESS CONTENT MANAGEMENT SYSTEM (CMS): This gives each client approximately 80-90% control over their own site once we create it. Since our work is custom, it's not possible for 100% of a site to be management by this CMS or any other. If you have questions on what you can and can't control, please ask your account executive.</p> <p>OPEN SOURCE SOFTWARE:</p>

DESCRIPTION	HOURS / QTY	HOURLY RATE / F...	TOTAL
<p>All Wordpress websites utilize open source software (i.e. plugins) which are free for anyone to use. This allows us to give clients amazing functionality for a fraction of the cost. Since Vivid Candi does not personally hard code and develop this open source software company, client may not hold Vivid Candi liable for any bugs or glitches that occur on a plugin post launch after our included 30 day support for new websites. Any support needed for issues of this kind that occur after the first 30 days a new website is launched will incur an additional fee for our time to look into and solve any issues.</p> <p>DIGITAL APPROVALS FOR PROJECT MILESTONES: At each milestone during a project (i.e. layout approval, soft launch, full launch, etc.)-- we require that each client signs a digital agreement approving the current milestone in writing.</p> <p>MAX CAP OF HOURS POLICY: Every flat rate project is subject to a maximum amount of allocated hours for labor that is specified on the original estimate. Due to the custom nature of our projects and clients, no website project is identical in the amount of hours involved. This also ensures that our clients always receive prompt responsive customer support throughout their project. All hourly work exceeding the maximum cap of hours allocated for a project will be billed at a reduced hourly rate of \$90/hr and due upon receipt.</p> <p>PROJECT TIMELINE POLICY: Due to the unique nature of each of our clients and their</p>

<p>website's needs, we do not guarantee any exact deadline for completion of any clients' website. The average timeline that most clients experience is 2-5 months, however it's possible a project could take longer due to delays in feedback, complicated requests, receipt of required items, etc.. We will always aim to please and meet any desired deadlines. Communication is key in this process and we will always be happy to provide an ETA for completion or next steps.</p> <p>BLOCK WORK SCHEDULES: At Vivid Candi, we tend to work in blocks of 4-8 hours, so don't be alarmed if you don't see progress immediately or daily. Working this way allows us to make a much bigger dent and focus much better thus creating a much better quality product rather than working bits at a time.</p> <p>TELECONFERENCES / MEETINGS: Your Vivid Candi account executive is always happy to talk to you anytime upon request or when you call in. However, for more in depth conversations requiring the technical expertise of our web designers-- all phone calls and meetings are strictly by appointment.</p> <p>EXCESSIVE EMAILING POLICY: Occasionally we receive clients who want to CC us on numerous emails vs. collaborating internally as a group and then sending us the feedback. This causes many miscommunications and can add much more time to any clients project since we have to do extra work replying to numerous emails in great detail and checking for emails that</p> <p>Thanks for your consideration.</p>

<p>change previously emailed requests. We also occasionally get clients whom want to email us up to 10-15x per day with every question or thought that comes to mind. All of this is ok and we're happy to reply, but please note we do bill our time for email replies, especially when they are in excess and excessive emailing can lead to a client pushing their project over their max cap of allocated project hours thus charging them our reduced hourly rate per max cap of hours term for exceeding time per that term described above in detail. We recommend that our clients lets us guide the way and communicate with them direct via Skype, teleconference or in person meeting at each milestone to avoid excessive emails, miscommunications and exceeding their max cap of hours. This ensures all communication is crystal clear.</p> <p>BROWSER COMPATIBILITY: All websites Vivid Candi produces are meant to be compatible with the latest modern browsers such as Chrome, Firefox, IE9/IE10 and Safari. However, Vivid Candi will not guarantee compatibility with older browsers such as IE7 or IE6 which are less than 3% of the total browser market share. Additionally, most sites Vivid Candi produces use mobile friendly technologies such as AJAX, jquery, HTML5, etc.--- however we do not gaurantee any site will look 100% perfect on these devices unless client wishes to pay for additional time to optimize for each major device, separate css and test. Client understands that all time spent on browser optimization will be billed hourly out of project time. Client also understands that the process of browser optimization is a collaborative effort between client's team</p>
